# ActiveDataTools

Powerful data cleansing, correction and conversion tools.

ActiveDataTools is a Windows-based application that helps you quickly load, fix, tidy-up and cleanse data from a wide variety of formats.

It is the perfect tool for anybody who needs to frequently manipulate, analyse and convert data.

- Financial and Accounts Teams
- Sales and Marketing Teams
- Developers and Technical Teams
- Human Resources

Why do I need ActiveDataTools?

If you've ever been left frustrated when trying to work with data, ActiveDataTools is for you.

- Easily split people's names in to separate columns (title, first, last)
- Validate email addresses and bank details
- Generate incredibly realistic test data in seconds
- Convert data from one format to another
- Split and merge huge CSV, Pipe and Tab files

Hundreds of Time Saving Data Correction and Cleansing Features

Effortlessly correct problems in your data, remove padding, split and join columns, de-dupe, remove non-printable characters and much more...

Group and sort your data, create queries and filters and visualize your data quickly and easily.
